

Howard Solutions Ltd

HS Reel Liners for Continuous Digital Printers

- ✓ Improve the productivity efficiency of your print and mail factory
- ✓ Make a safer place to work

Gives the following benefits:-

- ✓ Reduce down time – prevent annoying 'wrecks' and miss feeds when feeding inserter/finishing equipment
- ✓ Save paper by using up 98% of your reel stationery
- ✓ Remove health and safety risks. Reduce back injury – no lifting of 'over weight' part reels to rewind on
- ✓ Prevent 'memory curled' stationery
- ✓ Reduced wastage – no 'nearly used up reels' littering your print/mail area.
- ✓ Using part used reels for this purpose can lead to slack tension – and an expensive scrapped reel of paper!
- ✓ Excellent reel quality – straight and tight; no dished or 'sombbrero' reels - Work on all makes and models of unwinds and rewinds - Easy and convenient to store when not in use - Help preserve a clean and tidy print and mail area.

HSE manual lift guidelines are a maximum of 25kgs for men & 16kgs for women – See diagram extracted from the HSE manual lifting guide. Download full guide from <http://www.hse.gov.uk/pubns/indg143.pdf>

- ✓ Light weight – only weighs 5kgs - Flexible and durable, does not bend or buckle – withstand abuse and rough treatment, unlike metal based types.

Specification

Material: Polypropylene (6mm). Construction: Fully Welded with centre reinforcement.

Size: Outside Diameter 250mm x 457mm long (for 2 up A4 forms & tractors). Fit 70mm

Airshaft/mandrel. Other sizes available & 3 inch Airshaft/mandrels. Please ask for more details.
